

RECHNER SENSORS

LEVELMASTER—For Conductive & Adhesive Liquids or Pastes

Ketchup Level Control

RECHNER Sensors have designed a new level control sensor to deal with the problems of conductive and/or adhesive liquids/pastes. The LevelMaster sensor replaces the expensive and complex measuring systems frequently employed today to solve these measuring problems.

This sensor provides reliable and repeatable detection at the sensor's tip when totally immersed in the product or the foam and is able to ignore massive build-up on the sensing surface.

- All LevelMaster Sensors are equipped with our proven EasyTeach technology.
- Reliably detects the level or presence of problem liquids, pastes, or syrups; in containers, tube systems, or pipelines such as:
 - Oils; including Vegetable and Mineral.
 - Vinegar, Alcohol, Water, Beer, Syrups, Fruit Concentrates.
 - User can choose to detect the product or the foam.
 - Ketchup, Mayonnaise, Mustard, Salsa, Batters and more...
- Complies with FDA (FDA 21, CFR 177.2415) and EHEDG (European) requirements with a wide range of available adapters and process connections.

RECHNER SENSORS

LEVELMASTER—For Conductive & Adhesive Liquids or Pastes

NPN:

KS-700-26-A-PEEK/VA-1/2"-Y5-ET (ETW)

PNP:

KS-800-26-A-PEEK/VA-1/2"-Y5-ET (ETW)

Easy Teach by Button (ET) or Wire (ETW)

Non-Flush Mountable

Normally Open or Normally Closed

Process Connection: G 1/2 inch

Y5 M12 Quick Disconnect connector

V4A Stainless Steel housing with PEEK tip

NPN:

KS-700-26-A-PEEK/VA-1"-Y5-ET (ETW)

PNP:

KS-800-26-A-PEEK/VA-1"-Y5-ET (ETW)

Easy Teach by Button (ET) or Wire (ETW)

Non-Flush Mountable

Normally Open or Normally Closed

Process Connection: G 1 inch

Y5 M12 Quick Disconnect connector

V4A Stainless Steel housing with PEEK tip
